Reason to shortlist†	Camera plus outage access	Higher published motor rating	Built-in LED; no camera needed

Read the notes and manufacturer sources on the next page before choosing a model.

Before you choose

B4310 and B5330 HP figures compare lifting capacity with AC motors; their motors are DC. Do not use HP alone to size an opener.

Selection guidance is editorial judgment based on listed features, not measured performance.

Battery backup is for door access. The B4310/B5330 guide says myQ app control and camera do not work on battery power.

Basic myQ access features and live viewing do not require a video plan; recorded video and advanced features can require a paid plan.

Confirm the exact US model, carton accessories, rail/door-height fit, local requirements and current manual before purchase. No prices or stock guarantee.
